

PRESS RELEASE

Young ophthalmologists square in Zahara Los Atunes

Cadiz, Spain, 23 May 2024 – Today NTC Ophthalmics Iberica, a pharmaceutical company based in Madrid, together with Medicontur, specialized in the development and manufacturing of high-precision IOL systems, are opening a special working meeting dedicated to young ophthalmologists.

“A career in Ophthalmology can follow different paths and it is important to give young people the chance to learn about the different ways their professional life can take”, says dr. David Antolín, Director of the event, CEO at Central Ocular, a group of eye clinics based in Madrid, Spain. “Thanks to the generous contribution of many professionals in the field of Ophthalmology, the course provides an overview of the career in terms of work, academics, and a perspective of different career paths not directly related to practice, like practice building, marketing, tax and legal advice among others.”

Pedro Zorita, General Manager of NTC in Spain, discloses the aim of the event: “We set up this work meeting to contribute to the professional career of the participants. NTC’s vocation towards R&D and evidence-based medicine is embodied in our concrete and proactive approach, which always inspires us.”

Building a personal project related to the practice of Ophthalmology is the core of this three-days event, 23-25 May 2024. The square includes sessions among ophthalmologists with different experiences (public medicine, private medicine, business) and non-ophthalmologist speakers, giving a broad view of the different career variants.

“Innovation, sustainability, and cutting-edge technology must be the drivers of the future and next generations”, states Miguel Ángel Isabel, CEO of Medicontur in Spain, “the companies operating in Ophthalmology can cooperate and play an important role in the development of new generations of professionals”.

Companies are aware of how they impact aspects of society: connecting industry and health professionals is crucial in the interests of good healthcare. and contributes to medical progress.
